

## ALL EVENT PROCEEDS BENEFIT THE NEW YORK CENTER FOR CHILDREN

The New York Center for Children is a child-friendly free clinic that provides medical and psychological care and treatment to victims of child abuse. By working in cooperation with New York City social services and law-enforcement agencies, NYCC helps investigations and prosecutions proceed more efficiently and with less trauma to children.

NYCC also trains professionals who work with children to recognize and respond to the signs and symptoms of abuse and teaches children, parents, and the public to prevent abuse from occurring. All services are provided free of charge.
